SUMMARY

I have basic knowledge of calculus, linear algebra, and probability parameters. In addition, I have a solid background in deep learning and things related to AI. I have the ability to design or select models appropriately for customer requirements. Proficient in libraries such as torch, pandas, opencv, transformer, keras

EDUCATION

University of Information Technology
3rd year majoring in information technology

April 2021 - Present
GPA: 7.3

CARRER OBJECTIVE

Looking for an opportunity to work with well reputed organisation or Institution which is looking for hard working interns who can help in development of data and AI

TECHNICAL SKILLS

Language	Rust, Python, C++, MDX
Database	MySQL, SQL server, Mongodb
Developer Tools	Git, Kafka, Hadoop, Spark, SSIS, SSAS

EXPERIENCE

I created real-time system using Kafka, Spark with python and yolov8 to detection people do not wear helmets when driving motorbikes

Using CNN for classification CIFA-10 dataset

Finetune model Bert from transformer

Create model RNN and LSTM from torch

I can create small model with Rust or C++
